PROFESSIONAL SUMMARY

Final-semester BSAI student with a comprehensive technical foundation across all primary AI domains, including Machine Learning, NLP, and Computer Vision. Proven track-record in developing end-to-end AI solutions and bridging complex theoretical concepts with practical, scalable implementation. Passionate about leveraging a versatile toolkit to solve high-impact, real-world challenges within a dynamic engineering environment.

My Projects

- **UrbanSeg-AI** - **Instance Segmentation for Urban Street Scenes using YOLOv8:** I used Streamlit, Ultralytics, OpenCV (opencv-python-headless), NumPy, Pillow, ImageIO, ImageIO-Ffmpeg
- **AI-GeoVisionID** – **Face Recognition System using Yolov8:** I used Streamlit, Ultralytics, OpenCV, DeepFace, TensorFlow, NumPy, Pillow, Protobuf
- **Vision Lock** – **Object Tracking System:** I used Numpy, Matplotlib, Python3, Open CV, Streamlit, RoboFlow
- **Safe Sight AI – PPE Detection System:** YOLOv8 (Ultralytics), OpenCV, NumPy, Streamlit, ImageIO, FFmpeg, PIL (Pillow)
- **PSO Finance Bot – 100% Offline, 100% Private Chatbot:** I used Framework: Streamlit (Python) | RAG Orchestration: LangChain | Vector Database: FAISS | Embeddings: Sentence-Transformers (all-MiniLM-L6-v2) | LLM Inference: Ollama (TinyLlama) | Storage: JSON-based state persistence

WORK EXPERIENCE

Techware Hub – AI Model Developer

- I worked on Python3, Data Visualization, ML, Comp.Vision, NLP, LLM, Rag, Langchain, Agentic AI.

NASA Space App Challenge 2025

- **Project selected in top 1900 out of 18500+ international projects**
- I used NASA POWER API, LLMs, Streamlit, TensorFlow/Keras, Python, MS Excel

Data Visualization Intern – TATA Group – Virtual

- Here I used Data Cleaning & Transformation, Power BI, Tableau, Exploratory Data Analysis (EDA), Data Visualization, Business Intelligence

Data Science Intern – British Airways – Virtual

- I used Python3, Numpy/pandas/seaborn, Tablue, Oracle, Linear/Logistic Regression, Deep Learning, NLTK/Spacy.

SKILLS

- Machine Learning
- Deep Learning
- Large Language Models (LLMs)
- Natural Language Processing (NLP)
- Computer Vision
- Reinforcement Learning
- Generative AI
- Prompt Engineering
- Retrieval-Augmented Generation (RAG)
- AI Agents
- Model Fine-Tuning
- Data Analysis
- Data Visualization
- Feature Engineering
- Model Evaluation
- MLOps
- AI Model Deployment
- Python
- TensorFlow / Keras
- Scikit-learn
- Pandas
- NumPy
- API Integration
- REST APIs
- NASA POWER API
- Streamlit
- Git / GitHub
- SQL
- Data Preprocessing
- Statistical Analysis
- Research & Experimentation

CREDENTIALS

- **Google** Certified AI Prompt Specialist
- **IBM** Certified LLM Fine-Tuner
- **Google** Certified AI Business Intelligence Specialist
- **Hugging Face** Certified LLM Fundamentalist

EXTERNAL FIELD EXPERIENCE

- Provided customer support for internet services of Rogers Communications, Bell Canada, Koodo Mobile, and Telus.
- Assisted customers in selecting plans, activating services, and resolving connectivity issues.
